13. Revegetation	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
14. Air Quality	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
15. Other: Inspect & Close	X	X	<input type="checkbox"/>

Purpose of Inspection:

Permitee requested that the Division inspect and close this permit.

Inspection Summary:

16. The site is located across the river near a gravel quarry operated by SunRoc. This site is similar to the Cobble/Sandstone permit that we visited earlier in the day as the rock harvested was material that was on the surface.

It has been several years since Feller Stone had removed any rock for this area and any impacts that their mining activity had created was not evident.

Inspection Date: June 21, 2005; Report Date: June 24, 2005

Page 2 of 2

S/053/019

There are no long term impacts caused by mining at the site. No pits or excavations were evident. The vegetation in the areas where rock removal had taken place had recovered and vegetation in these areas was as good as the surrounding areas.

Conclusions and Recommendations:

This site can be released.
